LSG , Tavazzano ,Italy
Package

Hobbies and interests

- Video editing, photo editing;
- Crypto has become my new hobby;
- Financial education;
- Traveling;
- Reading books.

MY PROJECTS

1. Weather

My first project was a Weather app,build with JavaScript, HTML and CSS. This application allow users to view current weather conditions and forcast for different locations. The app used OpenWeatherMap API to retrieve weather data.

2. Get Country

A project that focused on providing detailed about various countries around the World. This included information such as the official currency, population,capital city, language.
I used JS ,along with the Fetch API , to retrieve data from a database of countries.
I also incorporated HTML and CSS to design and style the user interface.

3. Portfolio

I developed my own personal portfolio website,utilizing HTML and CSS. This project allowed me to showcase my skills and my experience in web development,as well as provide an online platform for potential employers or clients to view my work.

4. Studio Sonia

I developed a website for a microblading studio using React Bootstrap for the first time. I used various components from the library to create a visually appealing and user-friendly interface. Implementing responsive design to ensure optimal viewing experience on different devices.
