Technical Skills

JavaScript
React.js
Ajax
Node.js
Git & GitHub
Agile Methodologies (Kanban, SCRUM)
Java 7-17
OOP
Spring Boot
Spring Web
Apache Maven
SQL Databases
Postman
HTML5
CSS3
Bootstrap
JSON
RESTful Web Services
HTTP
MVC Architecture
Functional Programming
Procedural Programming
Debugging skills
Thymeleaf
Canva
Figma
Microsoft Office
Adobe Premiere Pro

About me

I am a web developer who has gained experience in frontend technologies such as JavaScript, CSS, Bootstrap, React, and HTML5 and is focused on developing solid skills in these areas. Additionally, I have started learning back-end technologies, including Java and Spring Boot. During my studies, I have worked on personal projects to develop my skills and learn through experience the various technologies. I am open to working in a team environment and learning from other developers and designers. I am passionate about web development and want to continue learning and become a web developer with solid skills capable of developing efficient and high-quality web applications.

Education

Java Masterclass, TeachBit
2023

Java, SpringBoot, OOP, Data structures and Algorithms, Databases SQL.

Web Development Masterclass, Teachbit
OCTOBER 2022

HTML5, CSS3, JavaScript, React, Node.js, Ajax, React, Bootstrap, Git & GitHub.

Udemy
2022

JavaScript - The Complete Guide 2023 (Beginner + Advanced) Maximilian Schwarzmüller;

React - The Complete Guide (incl Hooks, React Router, Redux) Maximilian Schwarzmüller;

Amigos code
Relational Database and SQL;
JavaScript;
Git and Github Essentials;
Java.

High School General "Dragalina", Romania
SEPTEMBER 2006 — JULY 2010

High School Diploma with a focus on Mathematics and Computer Science.

Baccalaureate Diploma, awarded in July 2010.

My Projects

https://github.com/PaulaTomo/Quadratic-Equation-Calculator
Developed a Spring Boot application with React frontend to calculate quadratic equations. Implemented a user-friendly interface allowing users to input equation coefficients and obtain real roots as results

https://github.com/PaulaTomo/user-management
During my Java course, I collaborated with my fellow students on a team project called "User Management," which was developed using Spring Boot. Our project involved creating a user management system that allowed for the creation, editing, and deletion of user accounts, as well as the ability to assign different roles and permissions to users.

https://github.com/PaulaTomo/react-springboot-online-store

I am currently working on an e-commerce project where I am building an online store for dresses using React, Spring Boot, and SQL. This project involves developing a user-friendly interface using React for the front end, integrating it with a robust back end powered by Spring Boot, and utilizing SQL for efficient data management.

Travel Agency https://github.com/PaulaTomo/Tourism-agency

I created a Travel Agency project using React, React DOM, and React Bootstrap. React was used to make an interactive interface with reusable components, while React DOM displayed elements in the graphical interface. React Bootstrap enabled the responsive design and added functionalities like carousels and filters for searching tour packages.

Studio Sonia https://github.com/PaulaTomo/Studio-Sonia-with-React

I developed a website for a microblading studio using React Bootstrap. I used various components from the library to create a visually appealing and user-friendly interface. I have implemented responsive design to ensure optimal user experience on different devices.

Portfolio https://github.com/PaulaTomo/My-Portfolio

I developed my personal portfolio website, utilizing HTML and CSS. This project allowed me to showcase my skills and experience in web development, as well as provide an online platform for potential employers or clients to view my work.

Get Country https://github.com/PaulaTomo/Get-Country

I created a project that provided details about different countries worldwide, including official currency, population, capital city, and language. I used JS and the Fetch API to retrieve data from a country database. Additionally, I used HTML and CSS to design and style the user interface.

Weather https://github.com/PaulaTomo/Project-Weather

My first project was a Weather app, build with JavaScript, HTML, and CSS. This application lets users view current weather conditions and forecasts for different locations. The app used OpenWeatherMap API to retrieve weather data.

Employment History

Cedic Srl , Peschiera Borromeo, Italy;
JUNE 2020 — SEPTEMBER 2021

I produced medical devices and components that enhance patients' quality of life. Full time.

DHL, Liscate, Italy
JUNE 2019 — JULY 2020

At DHL, I performed picking, expedition, and packaging duties, gaining expertise in logistics management and ensuring timely delivery.

LSG, Tavazzano, Italy
MARCH 2014 — JUNE 2019

During my 4-year tenure at LSG, I worked in the production of various items for multiple stores. I collaborated with my team members to ensure that our products met high standards of quality and consistency.
